

- Miswiring will damage dimmer and void warranty, if there are questions please ask beforehand.
- Maximum LED draw is 4.2 Amps, exceeding amperage will damage dimmer and void warranty.
- See each LED specifications on our website for Amp draw per light, multiple by number of lights.
- Top Diagram below will dim any LED, and dimmable LEDs more smoothly.
- Bottom Diagram below is easier for existing installations and requires dimmable LEDs.

Hookup for Incandescent Lamp, LED, or Motor

Simplified Hookup for Incandescent Lamp or LED
