

SAN6053R – Rectangular Headlight sold by M4LED.com

This light is wired in an H4 Configuration. Some similar lamps such as a 4656 use a slightly different wire configuration. You can switch the wires to match your vehicle if necessary. See the below images to test your vehicle wiring and to swap the wires in the LED harness connector if necessary.

Comes as H4:
Green = Ground
Blue = Low Beam
Red = High Beam

For 4656,
Swap Green
& Blue Wires

To Swap Wires, insert a small tool into slot and push. Pull wire out of back of connector
